## Darphin Skin Care

In 1958, Pierre Darphin, a kinesiologist and cosmetologist with a passion for botany, opened his Beauty Institute in Paris. He created a unique method of skin analysis and a customised skincare system, offering each client a comprehensive and targeted beauty program.

On his quest for optimal performance, Pierre Darphin developed formulas integrating the finest aromatic plants and essences with breakthrough technology. He took great care in developing textures and scents that create exceptional sensory experiences.

A true master of skincare, Darphin upholds this tradition and philosophy of beauty today: high-potency products made with botanical ingredients designed for professional, custom care.

## Darphin's Signature

Customised, pampering pleasure is the hallmark of Darphin facial treatments. Each one is custom designed to not only beautify your skin, but to delight your senses and elevate your spirit.

## Nuskin Galvanic Spa System II

For the first time in history, **Nu Skin's** scientists have identified the genes in our DNA that are responsible for the ageing process. This is a dramatic departure from any other product on the market. **AGELoc™** science targets the **source** of ageing and not the signs. To find out more about the science behind **AGELoc™** and the amazing effect it can have on your skin make an appointment to see your skin care specialist at Beauty By Rebekah.
